NEXA Dune

Rounded acoustic felt panels. Soft form, serious absorption.

A WALL WITH DEPTH — IN ANY COLOR

NEXA Dune is a dimensional acoustic panel built from 100% PET acoustic felt — deep, rounded ribs that turn a flat wall into soft, tactile relief. Self-supporting and warm to the eye, it absorbs sound while doing the work of a feature wall. Shown here in four of the standard felt colors.

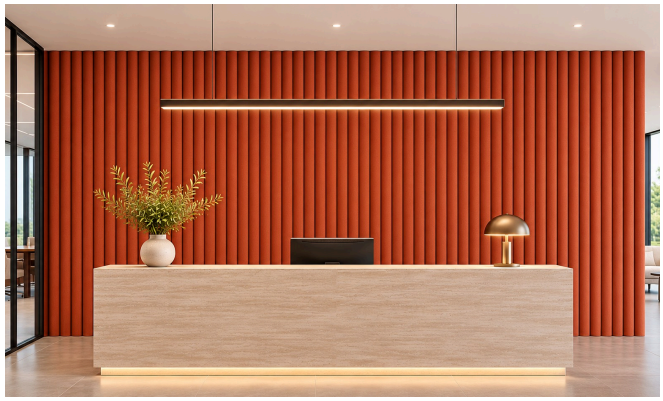

Sage Conference

Natural Boardroom

Charcoal Lounge

Terracotta Reception
